DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3, 5, 6, 12, 13, 16, 21-29, 32-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1, 13, the specification doesn't describe the fluid is in direct mechanical contact with the lower surface of the substrate. At this time, it is understood as "direct contact" with the lower surface.

Referring to claims 24, 27, it is unclear where in the specification teaching these limitations. Paragraph [0025] describes using these pins to keep the wafer from sliding away from the chuck during the process. If this is the case, these pins have to be in direct contact with the wafer in order to keep the wafer in place.

Referring to claims 25, 28, it is unclear where in the specification teaching of these limitations.

Referring to claims 26, 29, paragraph [0029] appears to teach that the second fluid cause the T at the edge to be substantially the same as the rest of the wafer, but not to make it differ from the central region of the wafer.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3, 5, 6, 12, 13, 16, 21-29, 32-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The specification doesn't provide the definition for "direct mechanical contact" and "no direct mechanical contact".

Claim Objections

5. Claims 32-34 are objected to because of the following informalities: there are no claims 30 and 31 in the amendment. They must be renumbered consecutively. Appropriate correction is required.

Allowable Subject Matter

6. Claims 1-3, 5, 6, 12, 13, 16, 21-29, 32-34 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 1-3, 5, 6, 12, 13, 16, 21-29, 32-34 are allowable because applied prior art doesn't teach or suggest the second fluid flows toward the outer edge of the substrate while in direct contact with the lower surface of the substrate.
